

Husqvarna Automower 450X NERA robotic mower

Automower 450X NERA

A mower for lawns up to 5000 m², with a 24 cm cutting width, 145 minutes of running and 40 minutes of charging. The boundary is set by a perimeter wire, and with the EPOS plug-in it works without one.

Key specifications

Working area	5,000 m ²
Max slope	50 %
Cutting width	24 cm
Runtime	145 min
Charging	40 min
Navigation	Boundary wire

From the datasheet

Working area	5000 m ² , ±20%
Cutting width	24 cm
Running time per charge	145 min

Charging	40 min
Slope	up to 50%, up to 25% at the boundary
Boundary	perimeter wire, EPOS plug-in for wire-free

Values are taken from the manufacturer's datasheet and apply to the standard version. The final configuration, options and lead time are confirmed in the quote.

What it does for you

The Automower 450X NERA covers a working area of up to 5000 m², with a tolerance of $\pm 20\%$. Cutting width is 24 cm, running time per charge 145 minutes and charging 40 minutes. It handles slopes up to 50% inside the area, and up to 25% right at the boundary.

Large lawns around a building

Five thousand square metres covers a garden, a hotel lawn or the green area beside an office building. The mower works to a schedule and returns to its station by itself, so upkeep comes down to changing the blades now and then.

Working without a boundary wire

With the EPOS plug-in the boundaries are set by satellite, with no wire to bury. Zones are changed in the app, which helps when a lawn is split into parts that are cut differently.
