

Segway Navimow X350 robotic mower

Navimow X350

A mower for lawns up to 5000 m² guided by satellite, with no boundary wire and no local antenna. It runs up to 200 minutes per charge and handles slopes of up to 50%.

Key specifications

Working area	5,000 m ²
Max slope	50 %
Runtime	200 min
Navigation	RTK GPS

From the datasheet

Working area	up to 5000 m ²
Per charge	up to 1200 m ²
Running time per charge	up to 200 min
Slope	up to 50%
Navigation	satellite, network RTK with no local antenna, plus camera
Larger model in the line	X390, 10000 m ²

Values are taken from the manufacturer's datasheet and apply to the standard version. The final configuration, options and lead time are confirmed in the quote.

What it does for you

The Navimow X350 covers up to 5000 m² and mows up to 1200 m² on a single charge. Position is fixed by satellite with a network RTK correction, so the garden needs neither a wire nor a reference antenna. Alongside satellite guidance it recognises obstacles with a camera.

Setting up without wire

The boundary is drawn in the app by walking the lawn, with no digging. The same goes for the zones to be left out: beds, a pool, trees.

Sloping and divided lawns

A slope of up to 50% covers the banks beside a drive or a terrace. For larger areas the same line offers the X390, rated for 10000 m².

Segway publishes neither a cutting width nor a charging time for this model, so those two items are not given here.
